HEARTWORM

(Dirofilaria immitis)

- HEARTWORM disease is serious and can be fatal to your dog.
- HEARTWORM can affect any dog, small or large breed, short or long coat, indoor or outdoor.
- HEARTWORM is spread by mosquitoes, it only takes one bite to infect your dog.

INTERCEPTOR® prevents a very dangerous parasite to your dog, Heartworm.

HOOKWORM

(Ancylostoma caninum)

- HOOKWORMS are most dangerous to puppies.
- HOOKWORMS attach to your dog's intestinal lining, leaving bleeding internal wounds.
- Infective larvae penetrate skin or are ingested by your pet.

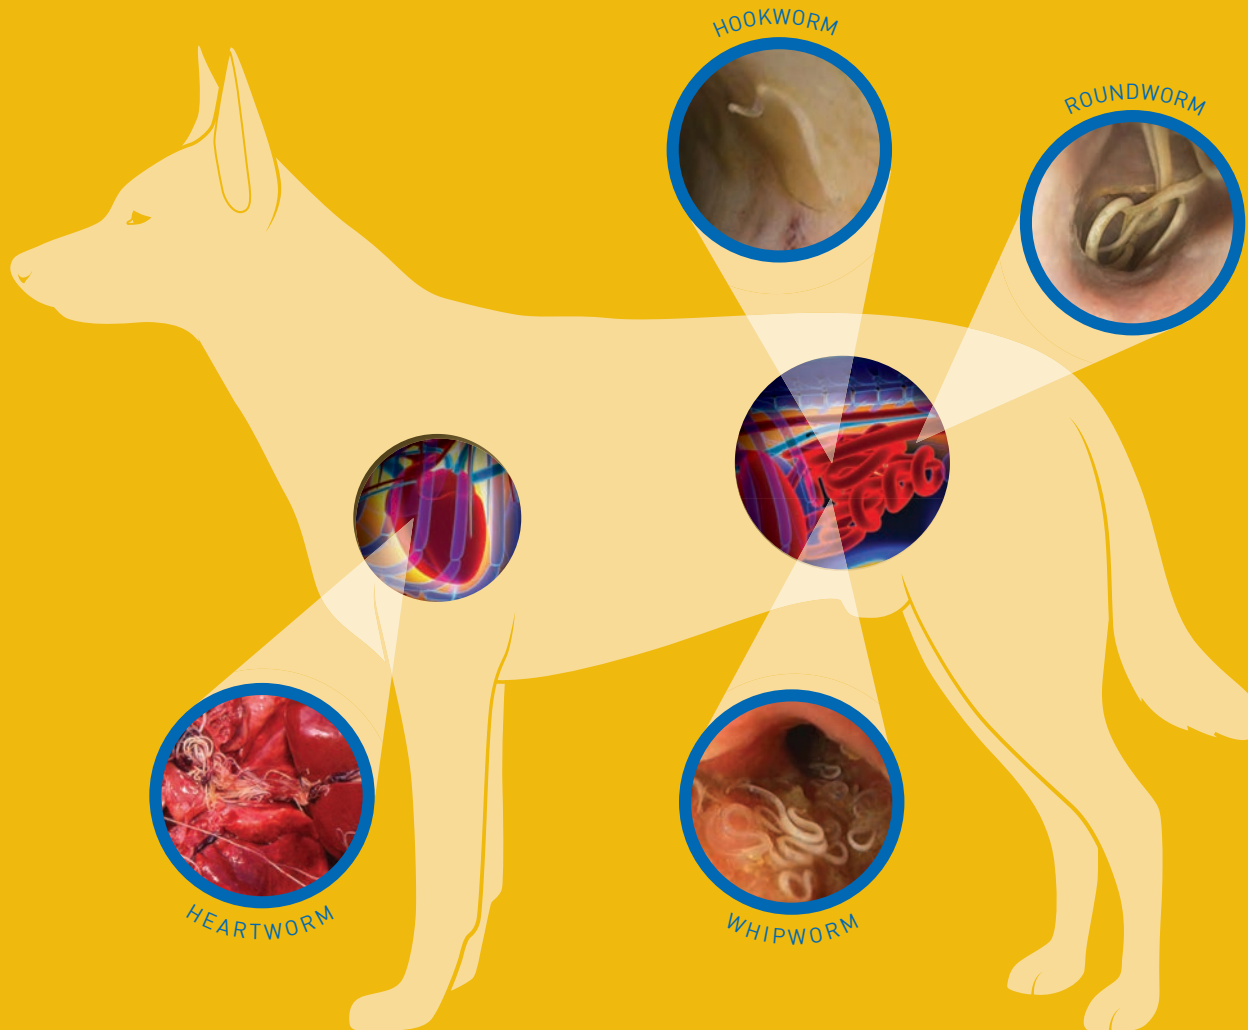

INTERCEPTOR® treats and controls Hookworms.

Trusted protection against heartworm disease and common intestinal parasites.

JOIN THE FIGHT AGAINST PARASITES

Just like there's an art to keeping your dog happy, there's a real science to keeping him healthy. Scheduling regular veterinary examinations is the best way to help ensure protection from common parasites and diseases found in your area.

Talk to your veterinary team to determine what is best for you and your dog.

ROUNDWORM

(Toxocara canis, Toxascaris leonina)

- ROUNDWORMS can cause serious harm to puppies.
- Mothers can pass larvae to unborn puppies or to nursing puppies.
- Puppies/dogs can ingest infective eggs from environment or by eating infected rodents.
- ROUNDWORM eggs can remain infective in the soil for years.

INTERCEPTOR® treats and controls Roundworms.

WHIPWORM

(Trichuris vulpis)

- Severe infections result in weight loss, dehydration and anemia.
- WHIPWORM eggs can stay alive in soil for several years.

INTERCEPTOR® treats and controls Whipworms.
