

## Regular Deworming Is Important For:

**Your Family**  
Deworming reduces the risk of parasite transmission to human family members<sup>1,\*</sup>

**Your Home**  
Deworming helps maintain a safe environment

**Other Pets**  
Deworming controls parasite transmission

**Your Cat**  
Deworming makes sure worms aren't making your pet sick

\*Roundworms (*Toxocara cati*) and tapeworms (*Echinococcus multilocularis*), in particular, can infect humans as well as pets. Human infection with hookworms (*Ancylostoma tubaeforme*), though rare in Canada, is also possible<sup>2-4</sup>.

Use Milbemax<sup>®</sup>  
to protect your cat.

## Regular deworming is important to keep your cat healthy

Any cat—even indoor cats—can become infected with worms, but they may not show signs of infection. These parasites are harmful to your cat's health, and severe infections can be fatal. In addition, certain roundworms (*Toxocara cati*) and tapeworms (*Echinococcus multilocularis*) can pose a risk to the health of your family.

Feline expert groups recommend deworming up to four times a year. (CPEP, Cat Healthy)<sup>3-5</sup>

## Help Eliminate a Broad Spectrum of Internal Parasites With Milbemax®

Milbemax prevents heartworm disease caused by *Dirofilaria immitis* and treats and controls the adult stage of hookworms (*Ancylostoma tubaeforme*), roundworms (*Toxocara cati*) and tapeworms (*Dipylidium caninum*, *Taenia taeniaeformis*, and *Echinococcus multilocularis*).

Small and beef-flavoured, Milbemax is an easy to administer tablet with a taste that cats love.<sup>6</sup>

Unlike topical treatments, Milbemax doesn't leave messy residue on your cat's fur, so your family doesn't have to avoid contact.

### Indications

Milbemax is indicated for the prevention of heartworm disease caused by *Dirofilaria immitis*, and for the treatment and control of parasitic infections due to the adult stage of hookworms (*Ancylostoma tubaeforme*), roundworms (*Toxocara cati*) and tapeworms (*Dipylidium caninum*, *Taenia taeniaeformis*, and *Echinococcus multilocularis*) in cats six weeks of age or greater and/or weighing greater than 0.5 kg body weight.

### Important Safety Information

The label contains complete use information, including cautions, and warnings. Always read, understand and follow the label, and use directions.

## Take the Milbemax Quiz to Understand the Risks of Internal Parasites

- Is your cat less than one year old?
- Does your cat spend time outdoors?
- Are there other pets in your home, and do they go outside?
- Does your cat catch mice, squirrels, or other prey?

**If you answered yes to one or more, your cat is at risk! The more positive answers, the greater the risk.**
